📍 Karachi, Pakistan

📅 13, February 2001

EDUCATION

BS Digital Systems & Web Technology Hamdard University

11/2023 - 09/2025

Karachi, Pakistan

Associate Degree in Software Development Hamdard University

10/2020 - 09/2022

Karachi, Pakistan

WORK EXPERIENCE

Machine Learning Intern

Embedded Systems & Computer Vision, NED University

03/2025 - 07/2025

Karachi, Pakistan

Achievements/Tasks

- Created Web-Based Online Course Recommendation System

Full-Stack Development Intern

National Center of Cyber Security, NED University

10/2022 - 02/2023

Karachi, Pakistan

Achievements/Tasks

- Created CSR Portal (Web-Based Complaint Management System)

SKILLS

Machine Learning (Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn)

Data Analysis & Visualization with Python (Numpy, Pandas, Matplotlib, Seaborn)

Full-Stack Web Development (Django/Flask Framework, HTML, CSS, JavaScript & Bootstrap)

Web Scrapping (BeautifulSoup, Requests, Scrapy, Selenium, Lxml)

Python Programming Language

Database (MySQL)

PROJECTS

AI Chatbot (08/2025 - 08/2025)

- Technologies Used:** Google Gemini API Key, Flask Python, HTML, CSS, Bootstrap, JavaScript, NLP
- Tools Used :** VS Code
- Key Highlights:** Built a seamless interface with the Gemini API for real-time, efficient conversations, optimizing scalability and performance for enhanced user interaction.

Online Course Recommendation System (07/2025 - 08/2025)

- Technologies Used:** Django, Python, HTML, CSS, Bootstrap, JavaScript, Machine Learning, NLP
- Libraries Used:** Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLTK, SpaCy, Sentence-transformers, TF-IDF (from scikit-learn)
- Tools Used :** Jupyter Notebook, VS Code
- Key Highlights:** Developed a web platform using Django and Machine Learning to recommend personalized courses, featuring an AI chatbot and a study material hub . Admin dashboard for user tracking, with NLP and MySQL powering course recommendations.

Exploratory Data Analysis of Laptop Sales in 2025 (03/2025 - 03/2025)

- Libraries Used:** Numpy, Pandas, Matplotlib, Seaborn
- Tools Used :** Jupyter Notebook
- Key Highlights:** Performed EDA on Pakistan's 2025 laptop sales data, including data cleaning, feature engineering, and creating visualizations. Analyzed trends in city-wise sales, processor/GPU preferences, and pricing, along with a correlation heatmap to uncover key sales influencers.

CSR Portal — Web-Based Complaint Management System (01/2023 - 03/2023)

- Technologies Used:** Django, Python, HTML, CSS, Bootstrap, JavaScript, MySQL
- Key Highlights:** Built a full-stack complaint management system with Django , featuring secure authentication, role-based access, and intuitive dashboards. Managed the entire complaint life cycle with real-time notifications and integrated forms for Civil, Electrical, and Contact Us requests.
